

Acción en Pacto Ministry Feeding Program (Bogotá, Colombia)

Thursday, June 3, a feeding program was started at Pacto en Acción Ministry Center. Praise God, it went well!

Mothers helped in the preparation of the meal since the day before. Arroz con pollo (chicken with rice) was prepared, which the children enjoyed.

The children came not only for the lunch, but also to study the Word of God, and those who need assistance in the school assignments received help.

The children who are studying in the afternoon came in the morning and had lunch before going to school. The children, who are studying in the morning, arrived straight from school for lunch and then the regular class in the ministry center.

When asked how the feeding program is a big help in the family, most mothers said, "Most of the time we don't have any substantial food to give to our children for lunch. It is a great blessing from God to be assured that before or after school they have food to eat."

Editor's Note: At present, the program is feeding about 100 children twice a week and, as the Lord provides, they hope to add more days a week. The cost is \$200 per feeding. The children who are fed come from very poor families and this extra assistance helps them in their nutritional needs. If you wish to give a donation towards this feeding program, to help keep it going, or even to expand it, contact one of the ACTION offices for details.
